

Press Release – Successful Business Launch of KSLEX in Munich

Munich, **June 2013** – KSLEX can now look back on a successful financial year 2012 and has, at the same time, exceeded all expectations. The FTE-turnover (full time equivalent turnover) was in the lower third of the law firms' turnovers published by JUVE for 2011/12 in its JUVE-Top-50-law firms survey.

„We are more than pleased with the progress we have made so far. Our clients, without any exception, never let us down and actively supported each step we took. Now it is time to embark on the next stage of development“, mentions Joerg Kretschmer, founding partner of KSLEX. Frank Schmeisser, also a founding partner, adds, “Due to our client base our first and foremost aim is for the firm to grow organically and laterally in the fields of Corporate and IP”.

The last financial year's emphasize clearly lay on advising in the corporate arena, and it turned out that corporate litigation increasingly gained relevance. For instance, KSLEX represented a minority shareholder of a leading European CEP service provider (Courier, Express, Parcel) which is part of a large European postal service group, both in ordinary courts and before an arbitral tribunal in corporate law and franchise law matters against the majority shareholder who belongs to another leading European postal service group. Moreover, KSLEX rendered both comprehensive extrajudicial advice and representation before various courts in all parts of Germany to a large German agricultural association concerning matters of corporate law and IP. In addition, KSLEX provided in depth advice on corporate law matters and regarding operative business to a car leasing company and vehicle fleet management service provider which is majority owned by a major European bank. KSLEX, furthermore, rendered advice in connection with the manroland insolvency and other matters, to a worldwide operating U.S. manufacturer of devices and machines in the printing industry.
